<b>Ville</b>	Beijing
<b>Référence</b>	24D1727331153
<b>Titre</b>	Graduate Program
<b>Description du poste</b>	<p>Are you a young engineer eager for challenges? Are you dreaming of diving straight into the operational world and shaking things up from the get-go of your career? Join our International Graduate Program! During the first two years of your professional life, get ready to immerse yourself in a company where every day brings a chance to make a real impact. Are you ready to take on the challenge?</p> <p>Veolia's Graduate program is a Group-wide program for young engineering graduates who are passionate about ecological transformation.</p> <p>The aim of this program is to attract, train, and develop these young talents wherever the Group is present, with a view to their rapid promotion to management or expert positions. Each year, the Graduate program offers a unique, dynamic, and accelerated career path to talented young people in the Group's various geographic regions.</p> <p>Over the course of the 24-month program, graduates take on five different assignments in various entities, both in their home country and abroad. This enables them to learn about the Group's different business lines and acquire a comprehensive vision of Veolia. At the same time, they are given training to support their progress and provide them with additional tools to better manage their careers within the Group.</p>
<b>Type de contrat</b>	Emploi
<b>Société</b>	VEOLIA
<b>Description de la société</b>	<p>Veolia Group aims to become the benchmark company for ecological transformation. Since its entry into the Chinese market in the early 1990s, Veolia has consistently provided a comprehensive range of efficient environmental services, including water, waste, and energy management, for urban and industrial sectors. The company has actively collaborated with various stakeholders to support China's green and low-carbon transformation.</p> <p>With over 11,000 employees in China, Veolia delivers professional environmental services all around China. In 2023, Veolia avoided over 880,000 tons of carbon emissions in China. <a href="http://www.veolia.cn">www.veolia.cn</a></p>
